

Overview of hue method

- Convert cut site image to HSV color space
 - H – hue
 - S – saturation
 - V – value
- Calculate average hue angle of pixels at/close to cut site
 - Smaller hue angle = more pink/red
 - Larger hue angle = more green

Note: all pixel hue angles ranged between 0° and ~100°

Change in hue from day 1 to day 3

Change in hue from day 1 to day 5
